- Real-time market data for informed, timely decision-making
- Automated generation of standard or customized client reports
- Access from desktop, web, or mobile — consistent performance anywhere

The Complete Derivatives OEMS Experience

Global Market Access & Collaboration

- 24-hour trading with a **Central Order Book**
- Effortless order handoff between users, desks, and regions
- **Access to global derivatives markets** from desktop, web, or mobile with identical functionality
- Real-time market data to stay informed and responsive in any trading environment

Analytics, Risk & Compliance

- Full analytics, compliance, and risk management reporting
- Automated generation of standard or customized client reports
- Real-time position monitoring and margin management tools
- **Derivatives pre-trade risk** controls to safeguard trading activity before execution
- Post-trade analysis to ensure regulatory alignment and operational efficiency

Unified Multi-Asset OEMS

- Combine derivatives workflows with equities, FX, and other asset classes for a single, unified OEMS experience
- Internalization capabilities to improve execution quality and reduce market impact
- Open architecture with no vendor lock-in — integrate seamlessly with your existing systems

Scalability & Performance

- **Infinite scaling** to handle expanding trading volumes and new market opportunities
- +10 years of market data history for backtesting and analytics
- Cost-efficient infrastructure to reduce transaction costs while maintaining performance

Advanced Execution Tools

- **Full High-Touch Lifecycle** from order receipt to execution and booking
- Low-latency, low-touch tools to expand DMA and automation
- **One-click multi-leg order creation** for rapid, complex strategy deployment
- Diverse order types to match trading styles and objectives
- Full actionable **Futures Ladder** with real-time depth-of-market
- Multi-leg strategy execution with **automated spreading** for optimized order placement
- **Stitching** — combine instruments into composite orders for advanced strategies
- Algorithmic trading to improve execution quality and reduce slippage
- Intelligent dispatching and allocations for best possible outcomes
- Pre- and post-trade automation to reduce manual steps and operational risk

One Global Platform for High and Low touch workflows

The Quod Financial Derivatives O/EMS provides derivatives desks a modern, cutting edge and fully functional solution that outstrips legacy vendors on every workflow. We deliver the same depth of functionality as leading legacy providers, with flexibility and innovation.
